Specification

Product	denaX uncolored for molecular biology
Product number	1118
Synonyms	Decontamination reagent for removal of DNA and RNA from different surfaces, such as benches, pipettors, PCR workstations and lab devices.
Storage	below 25°C
Retest period (months)	60
Parameter	Specification
Appearance	clear and colourless liquid
Functional assay (strand breakage)	passes test (revised)
Performance test (Efficacy of DNA degradation)	1 µg of dried DNA is incubated for 5 min with 100 µl of denaX solution. DNA degradation is evaluated by agarose gel electrophoresis.
Performance test (Efficacy of RNA degradation)	tested for the capability to eliminate RNA from surfaces
